CONTINUED DRY WEATHER MAKES WATER SCARCE

The continued dry weather is making water scarce both in country and town. In the city it would be well to be careful in the use of water, using no more than is absolutely necessary. The financial condition of the city is such that just at the present time it would be difficult to secure funds to sink a deep well, which will be necessary ere long because of the increased consumption of water.

PAIGE

Model Glenwood "36"—Electric lighting and starting—\$1275
Model Brunswick "25" 5-passenger—Electric lighting and starting—\$975

THE Paige Detroit Motor Car Company has no bonded or other indebtedness on which it has to pay interest—it has no excessive capitalization on which it has to earn dividends.

That enables it to put a full dollar of actual value into the car for every dollar of the selling price.

And this excess of real value creates a demand for Paige cars that cuts selling and advertising expense to the minimum.

And this in turn makes it possible to put still more value into the car.

Doesn't that look like sound reasoning?

Doesn't it make you want to investigate the Paige still further?

And just remember this—It is going to pay you to get your name on an order blank as quickly as possible—The Paige is going to be oversold again this year.
